30 / 100 Suggestions Summary

! Should Fix:

Optimize images

Properly formatting and compressing images can save many bytes of data.

[Optimize the following images](#) to reduce their size by 2.3MiB (99% reduction).

Compressing and resizing <http://74f150f7.ngrok.io/views/images/pizzeria.jpg> could save 2.3MiB (99% reduction).

Losslessly compressing <http://74f150f7.ngrok.io/img/profilepic.jpg> could save 9.5KiB (67% reduction).

! Consider Fixing:

Eliminate render-blocking JavaScript and CSS in above-the-fold content

Your page has 1 blocking script resources and 3 blocking CSS resources. This causes a delay in rendering your page.

None of the above-the-fold content on your page could be rendered without waiting for the following resources to load. Try to defer or asynchronously load blocking resources, or inline the critical portions of those resources directly in the HTML.

[Remove render-blocking JavaScript:](#)

<http://www.google-analytics.com/analytics.js>

[Optimize CSS Delivery](#) of the following:

http://fonts.googleapis.com/css?family=Open+Sans:400,700

http://74f150f7.ngrok.io/css/style.css

http://74f150f7.ngrok.io/css/print.css

▲ [Hide details](#)

Leverage browser caching

Setting an expiry date or a maximum age in the HTTP headers for static resources instructs the browser to load previously downloaded resources from local disk rather than over the network.

[Leverage browser caching](#) for the following cacheable resources:

http://74f150f7.ngrok.io/css/print.css (expiration not specified)

http://74f150f7.ngrok.io/css/style.css (expiration not specified)

http://74f150f7.ngrok.io/img/profilepic.jpg (expiration not specified)

http://74f150f7.ngrok.io/js/perfmatters.js (expiration not specified)

http://74f150f7.ngrok.io/views/images/pizzeria.jpg (expiration not specified)

http://www.google-analytics.com/analytics.js (2 hours)

▲ [Hide details](#)

Enable compression

Compressing resources with gzip or deflate can reduce the number of bytes sent over the network.

[Enable compression](#) for the following resources to reduce their transfer size by 2.3KiB (52% reduction).

Compressing http://74f150f7.ngrok.io/ could save 1.5KiB (51% reduction).

Compressing http://74f150f7.ngrok.io/css/style.css could save 861B (55% reduction).

▲ [Hide details](#)

Minify HTML

Compacting HTML code, including any inline JavaScript and CSS contained in it, can save many bytes of data and speed up download and parse times.

[Minify HTML](#) for the following resources to reduce their size by 665B (23% reduction).

Minifying http://74f150f7.ngrok.io/ could save 665B (23% reduction).
