❗ Should Fix:

Optimize images

Properly formatting and compressing images can save many bytes of data.

Optimize the following images to reduce their size by 2.3MiB (99% reduction).

Compressing and resizing http://74f150f7.ngrok.io/views/images/pizzeria.jpg could save 2.3MiB (99% reduction).

- -

Losslessly compressing http://74f150f7.ngrok.io/img/profilepic.jpg could save 9.5KiB (67% reduction).

▲Hide details

Eliminate render-blocking JavaScript and CSS in above-the-fold content

Your page has 1 blocking script resources and 3 blocking CSS resources. This causes a delay in rendering your page.

None of the above-the-fold content on your page could be rendered without waiting for the following resources to load. Try to defer or asynchronously load blocking resources, or inline the critical portions of those resources directly in the HTML.

Remove render-blocking JavaScript:

http://www.google-analytics.com/analytics.js

Optimize CSS Delivery of the following:

http://fonts.googleapis.com/css?family=Open+Sans:400,700

- -

http://74f150f7.ngrok.io/css/style.css

- -

http://74f150f7.ngrok.io/css/print.css

⚠ **Consider Fixing:**

Leverage browser caching

Setting an expiry date or a maximum age in the HTTP headers for static resources instructs the browser to load previously downloaded resources from local disk rather than over the network.

Leverage browser caching for the following cacheable resources:

http://74f150f7.ngrok.io/css/print.css (expiration not specified)

http://74f150f7.ngrok.io/css/style.css (expiration not specified)

http://74f150f7.ngrok.io/img/profilepic.jpg (expiration not specified)

http://74f150f7.ngrok.io/js/perfmatters.js (expiration not specified)

http://74f150f7.ngrok.io/views/images/pizzeria.jpg (expiration not specified)

http://www.google-analytics.com/analytics.js (2 hours)

Enable compression

Compressing resources with gzip or deflate can reduce the number of bytes sent over the network.

Enable compression for the following resources to reduce their transfer size by 2.3KiB (52% reduction).

Compressing http://74f150f7.ngrok.io/ could save 1.5KiB (51% reduction).

Compressing http://74f150f7.ngrok.io/css/style.css could save 861B (55% reduction).

Minify HTML

Compacting HTML code, including any inline JavaScript and CSS contained in it, can save many bytes of data and speed up download and parse times.

Minify HTML for the following resources to reduce their size by 665B (23% reduction).

Minifying http://74f150f7.ngrok.io/ could save 665B (23% reduction).

✓ **Congratulations! No issues found.**

Avoid app install interstitials that hide content

Your page does not appear to have any app install interstitials that hide a significant amount of content. Learn more about the importance of avoiding the use of app install interstitials.

Avoid plugins

Your page does not appear to use plugins, which would prevent content from being usable on many platforms. Learn more about the importance of avoiding plugins.

Configure the viewport

Your page specifies a viewport matching the device's size, which allows it to render properly on all devices. Learn more about configuring viewports.

Size content to viewport

The contents of your page fit within the viewport. Learn more about sizing content to the viewport.

Size tap targets appropriately

All of your page's links/buttons are large enough for a user to easily tap on a touchscreen. Learn more about sizing tap targets appropriately.

Use legible font sizes

The text on your page is legible. Learn more about using legible font sizes.

The results are cached for 30s. If you have made changes to your page, please wait for 30s before re-running the test.
